EXPERIENCE

Fidelity Investments

Software Engineer

June 2024 – Present

Salt Lake City, UT

- Modernizing legacy Java 8 applications to Java 21 and migrated them to Spring Boot, improving performance, security, and maintainability while ensuring a smooth transition
- Revamping and modernizing previously broken and outdated unit tests using JUnit and Mockito, increasing test coverage to 80% and significantly enhancing application reliability and stability
- Currently developing a new AWS Lambda with functionality to read and process email mailboxes via Microsoft Graph API

Associate Software Engineer

Jan 2023 – June 2024

- Completed Fidelity's prestigious LEAP Full Stack Engineer program, mastering modern web development technologies and enterprise software engineering practices
- Developed a Python script that migrated over 50 of the team's applications from Bitbucket to Github resulting in a substantial two-week reduction in manual effort and enhanced team productivity

Velvet (Decheque)

Software Engineer Intern

Sep 2022 – Jan 2023

Salt Lake City, UT

- Contributed to the migration of the Velvet application from Bubble.io to Next.js, developing and implementing new front-end features using a component-driven design approach
- Implemented comprehensive end-to-end testing using Selenium, resulting in a 30% reduction in critical bugs and a 25% increase in test coverage

Intermountain Health

Software Engineer Intern

May 2021 – May 2022

Salt Lake City, UT

- Implemented a password validator feature for a customer-health Angular application, enhancing security and boosting customer satisfaction by 80% through robust password enforcement
- Refactored critical REST APIs for a doctor-facing Spring Boot application, enhancing performance and reliability while creating comprehensive API documentation that didn't previously exist, resulting in 40% faster developer onboarding and establishing standards for future development

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frameworks/Libraries: Spring Boot, React/Next.js, Angular, Node.js, JUnit

Tools: Git, Jira, Agile/Scrum, Jenkins, Docker, Postman, Firebase, VS Code, IntelliJ, AWS, MySQL, Bash, TDD, SDLC, Maven, Tomcat

PROJECTS

Gifted | *React, Firebase, Firestore, Vercel*

June 2021 – Sep 2021

- Developed a web landing page with a four-person team, enhancing business interactions between athletes and influencers and boosting client engagement
- Leveraged React, Firebase, and Firestore to enhance the user experience, achieving a 50% increase in engagement and interaction rates on a critical application
- Integrated the web application with its iOS counterpart, boosting business interactions by 50% and increasing user satisfaction by 30%, demonstrating successful cross-platform connectivity

EDUCATION

University of Utah

Bachelor of Science in Information Systems

Graduated: Dec 2022
